

Eastwood Elementary School, Irvine, CA
Architect: LPA, Inc., Irvine, CA

Since the fall of 2017, this high performing school continues to amaze me in the way it constantly evolves as a result of its intentionally designed culture to empower change. LPA's brilliantly transparent design of the campus reinforces the agile nature of the work being performed. The transformation of culture in the creation of a dynamic student-centered experience clearly stems from its amazing leadership. The original committee of six teachers led by Principal, Aaron Jetzer, fully embraced the design thinking process and leveraged the resulting data from each and every stakeholder. The community's simplistic foundation of BRAVE - Believe, Respect, Adapt, Validate, Empathize seamlessly permits the agile environment to align with the culture in which they created.
